Forecast for Thursday 17 Nov 2022

Weather: Rather cloudy with showers, most frequent in the east of area and becoming heavier and prolonged in the afternoon. Showers will be wintry over highest tops. Fewer and lighter showers over western ranges such as Creag Meagaidh and the Monadhliath Mountains.

Chance of cloud-free hill tops above 800m: 40% best in west of area.

Low cloud and visibility: Mostly good visibility in west of area and between showers in east. Clouds will be extensive about 700 to 800m although above the tops at times in west. Clouds will come lower down the hills in east as showers turn more frequent with occasionally poor visibility.

Met Office Aberdeen Meteorologist's View
Walking conditions will become difficult over higher parts with strengthening winds, temperatures close to freezing and showers breaking out.

Forecast for Friday 18 Nov 2022
Weather: Cloudy with further outbreaks of rain, most persistent and heavy at times in east of area. Sleet possible on highest tops. Rain will become light and patchy during evening with drier weather developing.

Maximum wind: Easterly winds with average speeds of 25 to 30mph and gusts 45mph on the tops, gradually easing during afternoon.

Chance of cloud-free hill tops above 800m: 20%, most likely in west of area.

Low cloud and visibility: Often misty conditions with extensive cloud cover about 600 to 700m and some patches lower down. Pockets of good visibility, more especially in west of area with clouds higher up the hills at times.

Temperature: **Glens:** Plus 6 Celsius rising to 10 Celsius.
At 800m: Plus 3 Celsius.
Freezing level: 1300m.
